6. Read the following passage carefully and answer any four questions given after it :  $4 \times 1 = 4$

The hired labourers who had worked in the fields all the day, were haggling over their wages with the landlord. Disgusted with the miserliness of the landlord, they were imploring for some more grains towards wages. As if he was shaking out his hand to drop the leftover food after his meal, the landlord threw some grains into their laps. Watching this whole scene, Mallaiah felt despaired. When even the people who toiled are not getting enough wages, where is the hope for me to get even a grain here, he thought. With a feeling of despondency, he moved towards the fields in which harvesting was over.

$$4 \times 1 = 4$$

When you study the lives of *all* great achievers – those who have had the greatest influence on others, those who have made significant contributions, those who have simply made things happen – you will find a pattern. Through their persistent efforts and inner struggle, they have greatly expanded their four native human intelligences or capacities. The highest manifestations of these four intelligences are: for the mental, *vision*; for the physical, *discipline*; for the emotional, *passion*; for the spiritual, *conscience*.

Vision is seeing with the mind's eye what is possible in people, in projects, in causes and in enterprises. Vision results when our mind joins need with possibility. Discipline is paying the price to bring that vision into reality. Discipline arises when vision joins with commitment. Passion is the fire, the desire, the strength of conviction and the drive that sustains the discipline to achieve the vision. Conscience is the inward moral sense of what is right and what is wrong. It is the guiding force to vision, discipline and passion.

(From 'The 8<sup>th</sup> Habit' by Stephen Covey)

*Questions :*

- i) What are the four native human intelligences?
- ii) How is vision defined?
- iii) What is discipline?
- iv) How is passion defined?
- v) What is conscience?
- vi) According to the writer *all* great people have expanded their four native human capacities. Write **TRUE** or **FALSE**.

8. Study the advertisement given below and answer any four questions given after it :

4 × 1 :

**Proposals : How to conserve water**

If you want to learn how to conserve water and protect the environment, learning to conserve water is a great way to make a positive impact. A four-minute shower may not sound like much, but in reality can cost up to 40 gallons. But don't worry – there are ways to change water-hogging household habits into leaner, greener activities.

**Water Conservation Tips :**

- Run your dishwasher for only full loads.
- Turn off the tap when you brush your teeth.
- Check your faucets and toilets for leaks.
- Take shorter showers.
- Water your lawn in the morning.
- Use a cover on your pool.
- Wash your car with a nozzle on the hose.

**Did you know?...**  
Flushing the toilet accounts for 36% of household water usage. By placing a brick in the toilet cistern we could save 10 million litres of water a day.

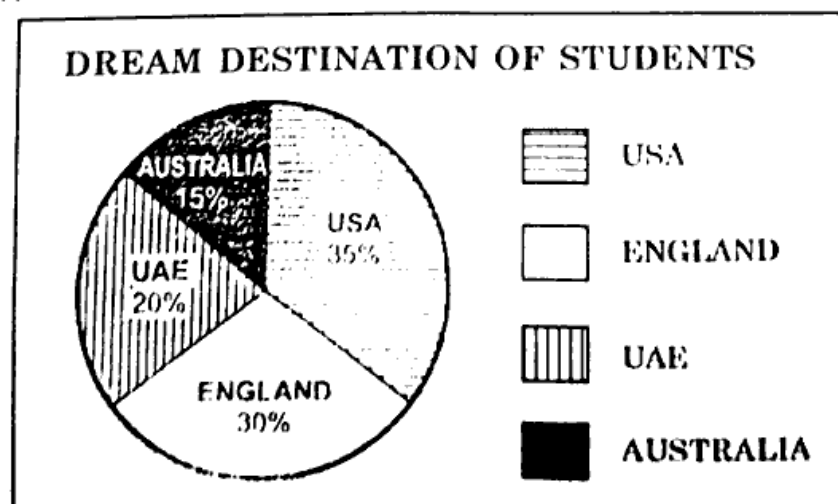

Questions :

- What is the advertisement about?
  - How much water is wasted in a four minute shower?
  - How many water conservation tips are mentioned in the advertisement?
  - The lawn should be watered only in the evening. Write TRUE or FALSE.
  - What should be put on the hose while washing cars?
  - Pick the antonym of the word, 'negative' from the advertisement.

18. Read the following passage and make notes. Add a suitable title. 1 × 4 = 4

When an ageing parent is to be cared for in the home of a grown child, there are few who are prepared for the physical, emotional and financial consequences this entails. To be the primary caregiver for another human being is a huge undertaking, and this is especially true when a grown child is caring for an ageing parent. To begin with, there is the emotional impact of the changing relationship between the parent and the grown child, whose role has changed from being the cared for

to the caregiver. For those who have always looked to their parent for support and guidance, this role reversal can come with a deep sense of loss. A similar feeling of loss can be felt by the parent, who may find it difficult to adjust to being the one who needs support rather than the one who gives it.

In addition to the emotional impact of caring for an ageing parent, there is the issue of their general health to be considered. Many people who survive past 65 have chronic or life-limiting medical conditions that require a high level of care. Another important thing to consider when making the decision to care for an ageing parent is their mobility. If they are unable to rise out of a bed or chair, for example, a certain amount of physical lifting may be involved. There is also the consideration of how self-sufficient they are on the toilet and in the shower.

There is no doubt that caring for an ageing parent will bring challenges, but if it can be managed well, it can also bring many rewards – the main one being a sense of fulfillment. If we can ensure that the parents who gave us life have a good journey to the end of their life, no price should be too high to pay.
