

## English Revision Assignment (Final Exams)

### Class VI

#### Section A

A1. Air pollution may rise due to domestic fire which is needed for cooking and heating. Its a weak and inevitable source of air pollution. Air pollution is caused by vehicles and other combustion engines. With constant increase in transportation, the problem of air - pollution has become very acute. Of course, we have less vehicles than the west yet the pollution is almost the same. This is mainly because of poor maintenance of vehicles emitting out poisonous smoke and the absence of any effective deterrent to ply such vehicles on the roads. Industry is also the main source and it covers all types of units which consume energy in any form. It includes coal, oil, natural gas and nuclear fission. Dark smoke of industries pollutes the air. Thermal power plants use the coal and it gives fly ash. It is a major health hazard and causes respiratory disease like tuberculosis.

Q. Answer the following questions :

- (a) What may cause air-pollution ?
- (b) How has the problem of air-pollution grown acute ?
- (c) What sources of energy are consumed by industry?
- (d) How is 'fly ash' harmful ?

#### A2. THE TOWN CHILD.....(A POEM)

I live in the town

In the street;

It is crowded with traffic

And feet;

There are buses and motors

And trams;

The houses all wait

In a row,

There is smoke everywhere

That I go.

I don't like the noises

I hear -

I wish there were woods

Very near.

There is only one thing

That I love,

And that is the sky

Far above,

There is plenty of room  
In the blue  
For castle of clouds  
And me, too.

- Irene Thompson
