India has been able to transform itself from a milk deficit country to the world's biggest milk producer, but the productivity of dairy animals in the country remains a concern. Discuss. (Answer in 250 words) (1) (2) (3) *if*

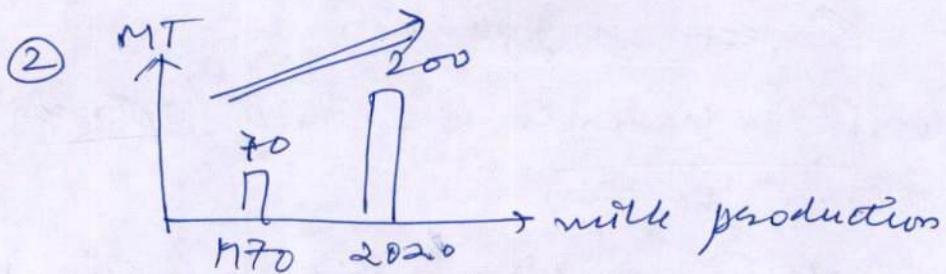

15

India is the largest producer of milk (200 MT) in the world. But dairy sector suffers from severe challenges.

Transformation

(1) Operation Flood (White Revolution)

↳ launched in 1970.

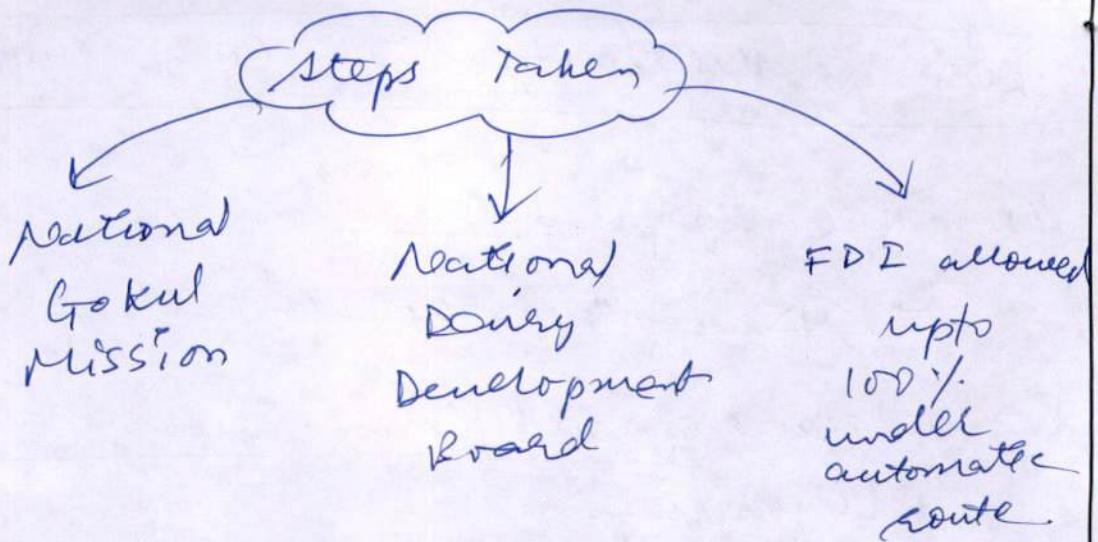

(3) Largest number of cattle in world

(4) Income of dairy farmers rose from £4000 in 1970 to £10000 now (NSO)

(5) Rise of dairy cooperatives
↳ Amul, Mother Dairy.

Low productivity of dairy animals

- ① High tropical diseases
 ↳ Foot & mouth disease
- ② Failure of artificial insemination techniques
- ③ Poor availability of feed (green & fodder (dry))
- ④ Low veterinary care available
- ⑤ Copra and oil cakes → too expensive.
- ⑥ Low cross breeding in dairy.
 ↳ Salimali X Jersey

 (only 0.84% of total GDP)
- ⑨ Lack of scientific management of cattle.

steps to take

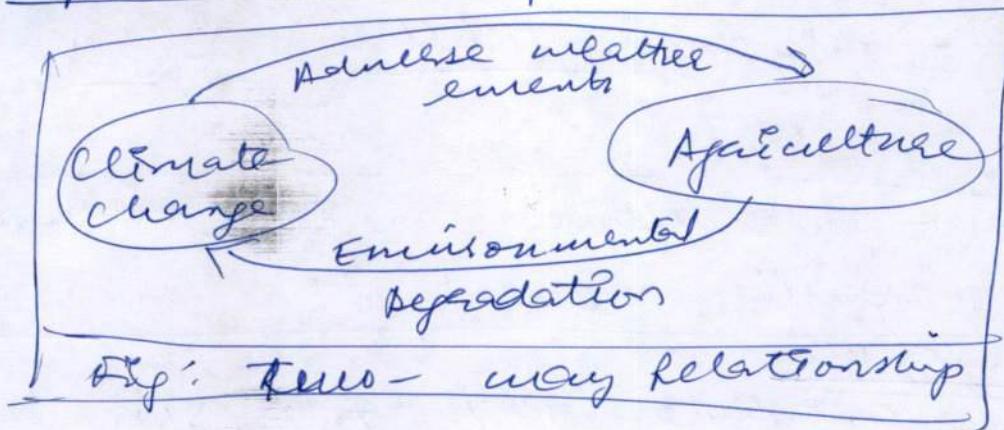

- * Technology transfers from Australia & New Zealand.
- * Dedicated dairy R&D at [ICAR].
- * Promote integrated farming → used cow manure for fertiliser.
- * Raise cross-breeding facility.
- * Rural health care centres for cattle.

While climate change is responsible for crop failures, the agricultural sector itself is partly responsible for extreme weather events. Discuss. What strategy has been adopted under National Agriculture Disaster Management Plan to strengthen the resilience of the farming community in India? (Answer in 250 words) ② ③ 15

Relationship between climate change and agriculture is deeply interlinked - with feedback & repercussion loop.

How climate change leads to crop failure?

- ① IPCC-6th Assessment Report → rising heat waves → lesser water for irrigation.
- ② IDMD points to erratic monsoon → 55% farmers monsoon dependent
- ③ Higher chance of pest attacks ↳ Loust attack - Punjab

- ④ rise of sea level → endanger coastal farms
- ⑤ global warming → ~~tower effect~~
affects metabolic processes
- ⑥ floods & cyclones rising ⇒
inundate ~~flood~~ farm lands.
- ⑦ snow melting in Himalayas
⇒ affect horticulture of JAK.

How agriculture leads to extreme weather events?

Air Pollution

- ① contributes 18% of GHG.
- ② Flood irrigation of paddy ⇒ methane emissions.
- ③ cattle also contributes to methane emission

Soil Pollution

- ④ soil salinization due to over irrigation ↗ Punjab
- ⑤ chemical pollution.

⑥ Lower fertility

\hookrightarrow Jungas \rightarrow carbon content
fell from 0.7% to 0.3%

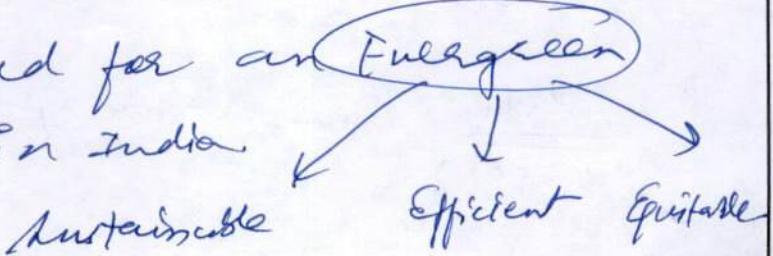

Water Pollution

- ⑦ Algal blooms due to nutrient-flow from farms
- ⑧ ground water pollution.

National Agriculture Disaster Management Plan

- * Develop climate resilient varieties
- * focus on irrigation \rightarrow drought resistance
- * Traditional farming methods
 \hookrightarrow Kharif \rightarrow under sea farming
- * Better weather forecast to predict monsoon & drought
- * Micro irrigation (Per Drop Irrigation)
- * Dryland farming
 \hookrightarrow collaboration with Israel

दिल्ली सहित भारत के कुछ क्षेत्र हिमालय में आने वाले भूकंपों के प्रभाव के प्रति अत्यधिक संवेदनशील हैं। विवेचना कीजिए। भारत में भूकंप से होने वाली हानि को कम करने के लिए कौन-से संस्थागत उपाय किए गए हैं? क्या आपको लगता है कि कुछ उल्लेखनीय कमियां अभी भी मौजूद हैं? (उत्तर 250 शब्दों में दीजिए) Some regions in India, including Delhi, are highly vulnerable to the impact of earthquakes originating in the Himalayas. Discuss. What institutional measures have been taken to mitigate earthquake losses in India? Do you think there are significant gaps that still exist? (Answer in 250 words) (3) 15

Earthquakes refer to sudden shaking of crust due to release of energy along faults.

They can do significant damage to life & property as seen in Turkey & Syria.

Vulnerability to eg earthquakes from Himalayas

* Continent-continent convergence is leading to rise of Himalayas & higher earthquake chances.

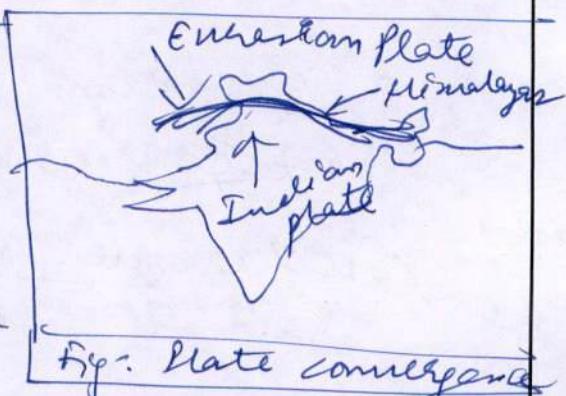

Fig: Plate convergence

* 52% of Indian land is vulnerable to earthquakes.

* Bhuj was a major event. (2001)

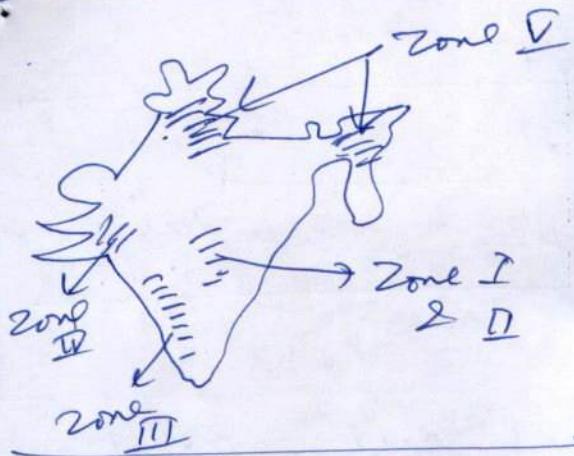

Fig: vulnerability map

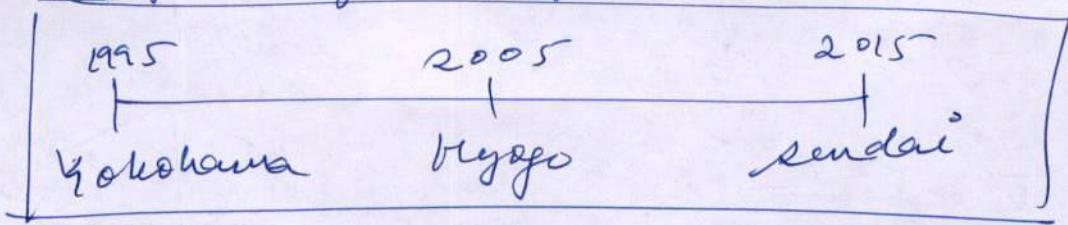

* Anthropogenic activities like mining, transport, tourism, further raise vulnerability.

Δ Tokhamath ranking -

Institutional Measures Taken

- ① NDMA guidelines for earthquake
- ② NDRF for rescue & relief.
- ③ SDO-Earthquake summit.
- ④ SARC Disaster Plan for regional cooperation.
- ⑤ Structural measures → earthquake resistant building code.
- ⑥ Non-structural measures → mock drills by locals.

⑦ Signed global agreements

Significant gaps still exist -

- ① Lack of local involvement
- ② Low use of nowcasting.
- ③ Poor adherence to building codes
- ④ Low integration of tribal knowledge
~~Andamanese tribes remained~~
safe in 2004 Tsunami.
- ⑤ Lack of inter-agency coordination
- ⑥ Low power to Panchayats
 (Principle of sufficiency)

Recently, scientists announced net energy gain in nuclear fusion reaction, which is considered as a major scientific breakthrough for the future of clean energy. What are the advantages of nuclear fusion based power generation? What are the limitations in using it to generate electricity at a commercial scale? (Answer in 250 words) (2) 15

Nuclear energy contributes just 2% of electricity in India.

Fusion technology can raise this share.

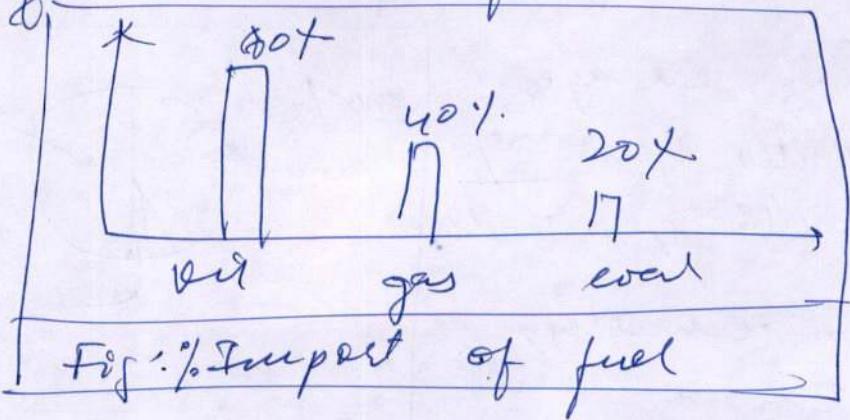

Nuclear fusion technology

$\text{D}_2\text{O} \rightarrow \text{H}_2 + \text{He}$ large atom is split into smaller atoms, (Plutonium, Tritium) releasing large Deuterium energy & heat-

Advantages of nuclear fusion

- ① Higher energy generation than fossils that is presently used.
- ② Lower emission & pollution
- ③ Clean and sustainable source.

- ④ It can attain self propagating chain reaction.
- ⑤ Can reduce import dependency for & save forex

- ⑥ Reduce over dependence on coal in supply mix.
- ⑦ Help reduce emissions & limit global warming to 2°C by 2100
- ⑧ Aid Paris climate goals of Glasgow
- ⑨ Uses Hydrogen → abundant in nature

Limitations of nuclear fusion

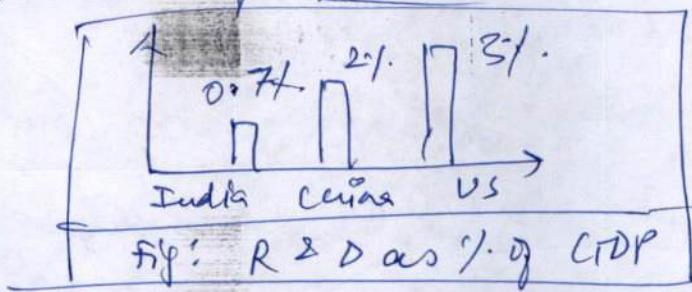

Technology-based

- ① High technology needed
- ② Difficult to achieve conditions for fusion.

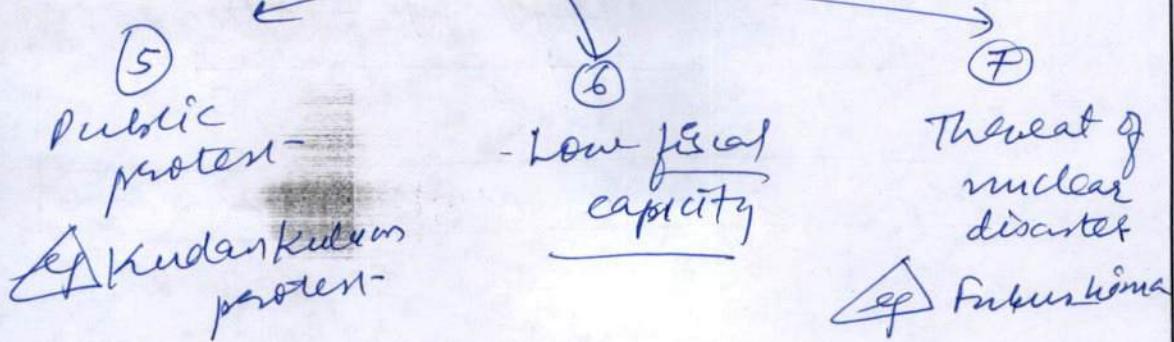

High temperature High pressure

③ High cost of fusion technology.

④ Lack of R&D in India

Other limitations

Steps → ① India is part of Tokamak experiment
 → Nuclear research part of NEP 2020
 → Technology - transfer ↳ (ECOT - USA)

Nuclear technology is a double-edged sword that needs to be used with prudence.
