CBSE Class 4 Subject Mathematics
NCERT Solutions
Chapter -6
THE JUNK SELLER

1. What about you? Do you also find Maths difficult?

Ans. I do not find Maths difficult.

2. What is the most difficult thing in you Maths book?

Ans. The chapter entitled "The Way the World Looks" is the most difficult thing in Maths book.

3. What do you think is the easiest lesson?

Ans. The lesson "A Trip to Bhopal" is the easiest.

4. Find out: how much for a cup of tea?

Ask people and find out the cost of a cup of tea

(a) At a tea stall

Ans. (a) At a tea stall, the cost of a cup is Rs 3.

(b) At a hotel

Ans. (b) At a hotel, the cost of a cup is Rs 10.

5. If a person who runs a tea stalls earns Rs 30 in a day, how much will he earn in 10 days? And in a month? How did you get the answer? Discuss.

Ans. Earning of a tea stall owner per day = Rs 30

Therefore, earning of a tea stall owner in 10 days = Rs (10×30) = Rs 300

And his, earning in a month = Rs (30×30) = Rs 900

I got the answers by multiplication.

6. Find out: What is a loan?

(a) Have you ever heard of someone taking a loan? For what?

Ans. (a) Yes, I have heard of someone taking a loan. It is taken to buy a handcart.

(b) How much loan was taken?

Ans. (b) Rs 300 was taken as loan.

(c) How much money was paid back.

Hariya and Babu went to buy a handcart for Rs 300.

Ans. (c) Hariya: I have taken a loan of Rs 300 from a Bank for six months. I will pay Rs 51 every month to the bank.

Babu: But I have taken a loan of Rs 300 from Chunnilal. After six months, I will pay back Rs 360.

(d) Who has to pay back more- Hariya or Babu?

Ans. (d) In case of Hariya: Money paid back to the bank = Rs. 6×51 = Rs 306

In case of Babu: Money paid back to Chunnilal = Rs 360

Since, Rs 360 is more than Rs 300, therefore, Babu paid back more money.

7. (a) I have 9 rickshaws of my own. I give the rickshaws on rent, each of Rs 20 a day. On Sundays I do not take any money from them? How much does Kiran earn from 9 Rickshaws in a Day?

Ans. (a) For 1 rickshaw she gets Rs 20 per day.

So, for 9 rickshaws she will earn Rs 180.

(b) How did you do it?

Ans. (b) I did it by multiplying 20 and 9 ($20 \times 9=180$).

8. In a week how much does Kiran earn from one rickshaw?

Ans. Since on Sundays Kiran does not take any money for rickshaw's rent, therefore, Kiran earns in a week on one rickshaw at the rate of Rs 20 per day = Rs 6$\times$ 20 = Rs 120.

9. Do it mentally and write the answers:

(a) 2$\times$ 6= __

Ans. (a) 2$\times$ 6= 12.

(b) 20$\times$ 6 = __

Ans. (b) 20$\times$ 6 = 120.

(c) 2 $\times$ 60 = __

Ans. (c) 2 $\times$ 60 = 120.

(d) 3$\times$ 42 = __

Ans. (d) 3$\times$ 42 = 126.

(e) 4 $\times$ 80 = __

Ans. (e) 4 $\times$ 80 = 320.

(f) 4 $\times$ 81 = __

Ans. (f) 4 $\times$ 81 = 324.

(g) 9 $\times$ 25 = __

Ans. (g) 9 $\times$ 25 = 225.

(h) 31$\times$ 9 = __

Ans. (h) 31$\times$ 9 = 279.

10. 4$\times$ 81 is 4 more than 4$\times$ 80. Am I right?

Ans. Yes.

11. How much Kiran will pay for 31 kg newspaper?

Ans. Kiran will pay for 31 kg newspaper = Rs (51 ✕ 30 + 5 ✕ 1) = Rs 155.

12.

(a) How much Kiran pay for 42 kg newspaper?

Ans. (a) Kiran will pay Rs (42 ✕ 5) = Rs 210.

(b) Also find the costs of:

(i) 22 kg of plastic

Ans. (b) (i) Cost of 22 kg of plastic = Rs (22 ✕ 10) = Rs 220.

(ii) 23 kg of wastepaper

Ans. (b) (ii) Cost of 23 kg of newspaper = Rs (23 ✕ 4) = Rs 92.

(iii) 12 kg of iron.

Ans. (b) (iii) Cost of 12 kg of iron = Rs (12 ✕ 12) = Rs 144.

13. Can you do this without writing? Guess the total money Kiran will pay to the junk collectors. Will it be: More than 600? Less than 600?

Ans. Less than 600.

14. Kiran bought 1 kg of plastic for Rs 10, but sold 1 kg plastic for Rs 12. How much money does she earn on selling 63 kg plastic?

Ans. Earning on selling 1 kg of plastic = Selling price – Cost price = Rs 12 – Rs 10 = Rs 2

So, earning on selling 63 kg of plastic = Rs 2$\times$ Rs 63

60	3
60$\times$ 2	3$\times$ 2
120	6

On adding the numbers in the last row = 120 + 6 = 126.

So, for 63 kg of plastic, Kiran earns = Rs 126.

15. How much money will Dinu pay for 32 kg iron?

Ans. The rate of 1 kg of iron is Rs 14. So, the cost for 32kg of iron is Rs 14$\times$ 32.

We write as:

	30	2
	30$\times$ 10	2$\times$ 10
10	300	20
	30$\times$ 4	2$\times$ 4
4	120	8

So, for 32 kg iron, Dinu will pay Rs 448.

16. Kiran buys 1 kg iron for Rs 12, but sells it for Rs 14. How much does she earn when she sells 32 kg iron?

Ans. Earning of selling 1 kg iron = Selling price -Cost price = Rs 14 – Rs 12 = Rs 2

So, earning on selling 32 kg of iron = Rs 2$\times$ 32 of iron = Rs 2$\times$ 32

We write as:

30	2
30$\times$ 2	2$\times$ 2
60	4

So, Kiran earns Rs 64 on the sale of 32 kg iron.

17. I bought 1 kg newspaper for Rs 5, but sold it for Rs 6. How much money did I earn by selling 152 kg of newspaper?

Ans. Rs 152.

18. How much money will Dinue pay for 4 kg brass? Guess the answer first.

Ans. The rate of 1 kg brass is Rs 170. So, the cost of 4 kg brass is Rs 170 $\times$ 4. We guess the answer to lie between Rs 600 and Rs 800.

We write as:

	100	70
4	100 $\times$ 4	70 $\times$ 4
	400	280

So, for 4 kg brass Dinu will pay Kiran Rs 680.

19. First guess the answer then calculate:

(a) 37 $\times$ 18

Ans. (a) On guessing 37 $\times$ 18 may be = 740.

We write as:

	30	7
10	30 $\times$ 10	7 $\times$ 10
	300	70
8	30 $\times$ 8	7 $\times$ 8
	240	56

Adding the numbers = 300 + 240 + 70 + 56 = 666

So, 37 $\times$ 18 = 666.

(b) 45 $\times$ 24

Ans. (b) On guessing 45 $\times$ 24 = 1080

We write as:

	40	7
20	40$\times$ 20	5$\times$ 20
	800	100
4	40$\times$ 4	5$\times$ 4
	160	20

Adding the numbers = 800 + 160 + 100 + 20 = 1080

So, 45 $\times$ 24 = 1080

(c) 69 $\times$ 52

Ans. (c) On guessing 69 $\times$ 52 = 3588

We write as:

	60	9
50	60$\times$ 50	9$\times$ 50
	3000	450
2	60$\times$ 2	9$\times$ 2
	120	18

Adding the numbers = 3000 + 120 + 450 + 18 = 3588

So, 69 $\times$ 52 = 3588.

(d) 77 $\times$ 55

Ans. (d) On guessing 77 $\times$ 55 = 4235

We write as:

	70	7
50	70 × 50	7 × 50
	3500	350
5	70 × 5	7 × 5
	350	35

Adding the numbers = 3500 + 350 + 350 + 35 = 4235

So, 77 × 55 = 4235.

(e) 142 × 5

Ans. (e) On guessing 142× 5 = 710

We write as:

	100	40	2
5	100 × 5	40 × 5	2× 5
	500	200	10

Adding the numbers = 500 + 200 + 10 = 710

So, 142 × 5= 710.

(f) 382 × 3

Ans. (f) On guessing 382 × 3 =1146

We write as:

	300	80	2
3	300 × 3	80 × 3	2× 3
	900	240	6

Adding the numbers = 900 + 240 + 6 = 1146

So, 382 × 3 = 1146

(g) 2 × 175

Ans. (g) On guessing 2 × 175 = 350

We write as:

	100	70	5
2	100 × 2	70 × 2	5 × 2
	200	140	10

Adding the numbers = 200 + 140 + 10 = 350

So, 2 × 175 = 350.

(h) 4 × 206

Ans. (h) On guessing 4 × 206 = 824

 We write as:

	200	0	6
4	200 × 4	0 × 4	6 × 4
	800	0	24

Adding the numbers = 800 + 0 + 24 = 824

So, 4 × 206 = 824.
