

Hots (Higher Order Thinking Skills)

Q. 1. What nature of plastics is used for making them as good storage containers of chemicals?

Ans. Plastics are non-reactive. They are used to store chemicals because they do not react with them.

Q. 2. What type of clothes should we buy for summer; cotton or clothes made from synthetic materials? Give reason for your answer.

Ans. Cotton clothes are more comfortable during summer, because they have large pores which allow the sweat of body to come out through them, evaporate and this make us feel cool.
