The working class movement emerged when the Congress ~~to~~ decided to work for the cause of labourers.

Earlier, the Congress was wary of speaking for the working class for fear of offending the industrial class capitalists.

However, the Socialist policies of Nehru supported the working class movement. Thus, in 1924, All India Trade Union Association was established which was presided by Lala Lajpat Rai.

→ Sasipada Banerji organised Labor class clubs for the upliftment of lives of working class.

CONTRIBUTION TOWARDS FREEDOM STRUGGLE

- Boycotted poor working conditions of industries owned and run by British
 - Participated in Non Cooperation, and civil Disobedience movement
 - Ahemabad Textile workers raised demands to increase their plague bonus. Mahatma Gandhi and Anusuya Sarabhai also supported workers
 - Wage hikes were demanded
 - Social security was demanded
- All these factors made it difficult for the British to run industries in India.

Tilak was a Congress man who belonged to the extremist group. He believed in protests, organising violent strikes.

→ However, Gandhiji believed in non-violence and wanted to use petitions and laws to get rid of British.

→ However, when British could not fulfill political demands of India, Gandhiji had to resort to Tilak's methods of protests but ~~non~~ non-violence was always maintained.

→ Tilak wanted the freedom movement to spread to entire country and so did Gandhiji.

- Tilak used ancient Hindu symbols like Shivaji, Ganesh Chaturthi celebrations to rally crowd during his movement against Partition of Bengal. This secluded Muslims.
- However, Gandhiji was more secular in approach when he led the Khilafat movement alongside Muslim.
- However, Gandhi used the terms Ram rajya for village but he believed in Sarva dharma Sambhava.
- Tilak founded the Home Rule League in Bombay so that British allows Indians to govern themselves.
- However, Gandhiji initially is famous of self-rule, finally demanded complete independence from British.
Thus, Gandhian politics was an extension of Tilak's politics.

World's oceans are losing their 'memory' due to human-induced warming in the following manner:

- Water bodies are shrinking and drying up
- Increasing heat waves in US and Europe have accelerated evaporation of water, leading to salinity and death of fishes and marine organisms in water bodies.

Thus, carbon emissions by humans have led to extinction of memory of oceans

Thus, it is time that we take urgent steps to restore the memory of oceans.

5. मृदा संशोधन क्या है? इससे संबद्ध लाभों और चिंताओं का मूल्यांकन कीजिए। (उत्तर 150 शब्दों में दीजिए) What is soil amendment? Evaluate the benefits and concerns associated with it. (Answer in 150 words) 10

Soil amendment refers to the measures taken to improve the ~~new~~ generation and management of soil.

Eg:- Using permaculture and organic farming to replenish soil nutrients

BENEFITS :-

- Using manure and compost revitalizes soil naturally.
- Dependence on chemicals of fertilizers is reduced
- Nutrient balance is maintained
- Excessive nitrogen in soil due to application of urea, is prevented.

- Planting trees to check soil erosion helps maintain quality of land.
- Percolation tanks, check dams prevent soil run-off during excessive rain.
- Permaculture: Eg:- mixing Chilli seeds with beans and Banana plant keeps pests away (due to Chilli) and beans help to fix nitrogen for the banana plant.

Thus, concerns need to be addressed before soil amendment practices can be scaled up to entire country.

6. यह सुझाव दिया गया है कि अगले दशक में हाइब्रिड विद्युत संयंत्रों की संख्या में तीव्र वृद्धि हो सकती है। ऐसे विद्युत संयंत्रों से प्राप्त होने वाले लाभों का उल्लेख करते हुए, उनसे जुड़ी चुनौतियों पर चर्चा कीजिए। (उत्तर 150 शब्दों में दीजिए)
- It has been suggested that the next decade may see a boom in hybrid power plants. Stating the advantages that such power plants offer, discuss the associated challenges. (Answer in 150 words) 10

Recently, UAE has invested in a hybrid renewable energy power plant in Gujarat under the T2U2 initiative. Thus, the next decade will see a boom in hybrid power plants.

ADVANTAGES:

- Lower carbon emissions
- Reduce intermittency problems.
Eg:- A hybrid solar-wind power plant can produce solar power during day and wind power at night
- More sustainable power generation,
- Reduce dependence on thermal power plants.
- Will help India to become net zero by 2070.

- will help to reduce Carbon emissions intensity by 45%.
- will help India to produce 500GW of renewable energy by 2030.

CONCERNS :-

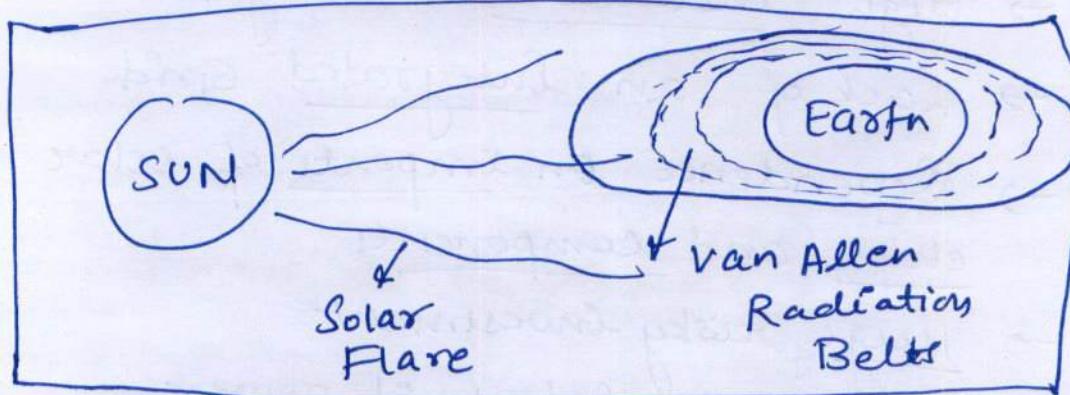

- Land acquisition issues
- High installation charges
- Lack of an integrated Grid
- Dependence on imports of solar chips and components
- Huge risky investment
- Storage of hybrid power is still a problem
- Losses in distribution and transmission of Hybrid Power.
- Lack of economic incentives to set up Hybrid Power plants.

Thus, the government needs to address these challenges to reap the advantages of hybrid power plants in the next decade.

7. वैन एलन रेडिएशन बेल्ट्स क्या हैं? इनके निर्माण का वर्णन करते हुए, चर्चा कीजिए कि इनके अध्ययन पर अधिकाधिक ध्यान क्यों दिया जा रहा है। (उत्तर 150 शब्दों में दीजिए) What are Van Allen Radiation Belts? Explaining their formation, discuss why there has been a growing focus on their study. (Answer in 150 words) 10

Van Allen Radiation Belts

are produced when solar flares and solar radiations hit the ~~sofa~~ earth's atmosphere.

FORMATION :-

- The earth's magnetosphere gets activated when solar flares hit the earth's atmosphere.
- To prevent damage to earth, the magnetosphere generates belts which are called Van Allen Radiation Belts

REASONS FOR GROWING

FOCUS ON VAN ALLEN

RADIATION BELTS:

- Solar radiation i.e. UV rays can be extremely harmful for human skin, leading to cancer.
- Solar radiations can adversely affect terrestrial and marine ecosystems.
- Thus, it is important to study the genesis of van allen belts as well as solar flares so that damage can be contained.
- Increasing fusion reactions inside the sun and the growing sensitivity and activity of Earth's magnetosphere have increased the frequency of van allen belts due to which scientists are focusing more on it.

Marital rape refers to sexual assault by a husband over his wife. In India, there are rising cases of marital rape and increasing demands that marital rape should be criminalised.

ARGUMENTS IN FAVOUR :-

- Marital rape is against Right to life and liberty of a woman (Article 21)
- It adversely affects a woman's dignity
- Violates her freedom (Article 19)
- women's body is not a commodity which can be forcefully used by a man, even if it is her husband.

ARGUMENTS AGAINST:-

- Criminalisation of marital rape will lead to breakdown of the institution of marriage.
- Will create Social Instability
- Women can misuse the law to settle personal scores with the husband and her in-laws.
- Litigation will rise.
- No way to verify whether marital rape was attempted to by the husband.

Thus, the matter on marital rape needs to be thoroughly discussed in Parliament before it is criminalized.

Care economy refers to the economy which involves treatment, ~~and~~ healing and caring of patients by nurses, allied medical health professionals

children by mothers (housewives), anganwadi workers, creche teachers

elderly
 (Senior citizens) by their children or NGO workers.

CHALLENGES ASSOCIATED :-

- unpaid care work by women for taking care of children and elderly, remains unmonetised, unmeasured and is not included in GDP. Thus, it is not treated with due respect.

- Lack of volunteers to do social service and provide care to widows and other senior citizens.
- Lack of investments in the caring sector.
- Lack of regular jobs to nursing staff (Adhoc jobs disincentivise them)
- Brain drain of nurses from Kerala to UAE and other advanced nations like UK which has NHS.
- Lack of incentives and training to allied medical health professionals
- NGOs and Anganwadi workers are inadequately trained.

STEPS TAKEN:

- National Creche Scheme has mandates setting up of ~~creches~~ creches in organisations with more than 100 workers or employees so that care can be provided to children of women employees.
- Investment by Ratan Tata in a startup called Goodfellows which provides care and assistance to senior citizens.
- Incentives to NGOs, nurses to take up caring profession.

All these steps are leading to gradual development of care economy in India.

Learning poverty refers to the phenomenon of deprivations of learning ability among the students at schools as well as colleges.

Pandemic has led to lockdowns and shutting down of schools and colleges, leading to immense learning losses.

IMPLICATIONS :-

- SOCIAL IMPLICATIONS :-
 - Students have been deprived of mid-day meals at schools
 - Less nutrition has hampered their ability to learn.
 - Crucial lessons of gender equality, caste equality have not been learnt at home.
- ECONOMIC IMPLICATIONS :-
 - Low incomes did not enable students to get access to

- digital devices.
- As a result, suicides occurred.
- Also, hiring from ~~under~~ colleges decreased as industry perceived these students of lower quality.
- Students spent more time on social media and games like PUBG.
- Mental Health suffered.
- Cheating in online tests occurred.
- Fair assessment could not occur.
- Students could not clear their doubts.

WAY AHEAD :-

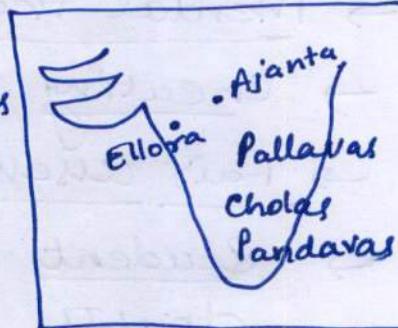

- Remedial Coaching for students who were left out during Covid.
- Use of AI to detect and identify students who need customised learning.
- Monitoring of grades of a student.
- Value-based education to students.
- Digitisation of learning to be promoted.

Thus, these steps can help to put the learning poverty in the museums to which it belongs.

11. दक्षिण भारत में भित्ति परंपराओं के विकास पर प्रकाश डालिए। साथ ही, उनकी महत्वपूर्ण विशेषताओं का सविस्तार वर्णन कीजिए। (उत्तर 250 शब्दों में दीजिए) Bring out the evolution of mural traditions in South India. Also, elaborate on their significant characteristics. (Answer in 250 words) 15

Inspired by Ajanta, Ellora and Badami murals, mural traditions flourished under Cholas, Pandavas and Pallavas in South India.

- First, murals with images of Gods and Goddesses developed under Pallavas at Kanchipuram.
- Images of King Mahendravarman shown as Chitrakarpuli and Vichitra-chitta were shown. This was in 7th century.
- Under Pandavas in 8th century, Sitankalal caves developed which showed traditions of Jainism and beautiful natural figures.
- In 9th century, under the Cholas, developed the murals at Brihadishvara and Rajrajeswara Temples.

These paintings proved to be an inspiration for Nayaka and Vijaya nagar paintings in 13th century.

Indian nationalism arose out of a desire to free the country from British imperialism. It was a result of many factors:

- COLONIAL MODERNITY
 - British education system devised by Macaulay for India wanted to create a class of Indians which was Indian in blood but western in tastes.
 - Hence, the upper middle class Indians started preferring cheap machine-made goods produced at Lancashire instead of traditional clothes.
 - This led to decay of traditional handicrafts industry in India.

→ Due to deindustrialisation, cotton weavers went back to villages which increased pressure on agriculture and also led to poverty.

- RAILWAYS :-

British modernised India through introduction of railways, which integrated all the markets.

→ However, the old guarantee system of 5% assured returns to investors in London resulted in drain of wealth.

- DEVELOPMENT OF JUTE, Cotton INDUSTRIES modernised India but resulted in worker exploitation.

- FREE TRADE modernised India but heavy tariffs on Indian exports to Europe deprived India of crucial export surplus.

- RELIGIOUS REFORMS like abolition of Sati, legalisation of widow remarriage modernised India but were seen as an interference in Indian traditions by nationalism.

However, nationalism was not just a product of modernity. There were other factors too like:-

- POLITICAL :- Lack of freedom, rights
 - liberty to press
 - lack of universal adult franchise
- SOCIAL :-
 - famines, hunger
 - Poverty
 - Gender inequality
- ECONOMIC :-
 - High revenue demand
 - Commercialisation of agriculture
 - Overvalued rupee

All these factors led to Indian nationalism in 19th century.

Environmentalism refers to giving due regard to environment in nation's political and socio-economic policies.

Post-independence, environmentalism surfaced in many organised movements like :-

- CHIPKO MOVEMENT
 - in Uttarakhand
 - led by Sunderlal Bhaguna
 - women hug the trees to prevent the authorities from cutting trees for development projects.

- APPIKO MOVEMENT

- in Andhra Pradesh
- to prevent deforestation
- to prevent unplanned urbanization and industrialisation

- NARMADA BACHAO ANDOLAN

- led by Medha Patkar
- to prevent the authorities from building Sardar Sarovar Dam which could have adverse ecological effects on flora and fauna of the region.

- ANNA HAZARE's MOVEMENT in RALEGAON SIDDIH :

- to build rainwater harvesting structures in dry area
- watershed development

- Movement By NIYAMGIRI TRIBES
 - in Odisha
 - to protest against establishment of ^{POSCO} Vedanta mines and company which could lead to environment degradation

- JAL JEEVAN ABHIYAN

- is a movement by Ministry Of Jal Shakti
- to conserve groundwater
- to conserve rainwater by building percolation tanks, check ~~bunds~~ dams and bunds.

These organised movements have generated environmental consciousness and have strengthened environmentalism in India.

Napoleon, the great ruler of France blocked all economic routes to Britain.

Impact :-

- All trade routes were choked
- Free trade suffered
- Inflation in Britain
- Political instability due to economic hardships of people.

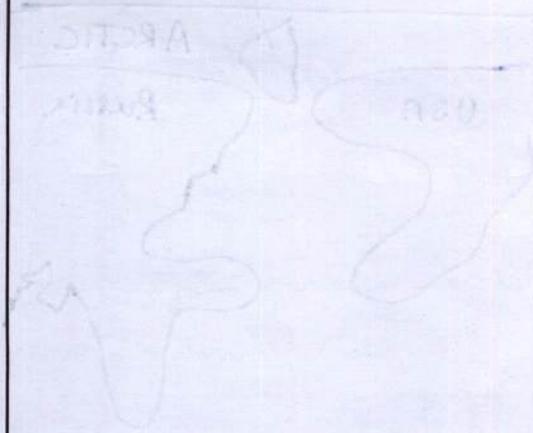

However, the continental blockade was an ill-conceived strategy as:

- Britain swore to take revenge
- Britain allied with other countries to alienate Napoleon

- Britain declared war on France.
- Since Britain was militarily superior, Napoleon lost in the famous Battle of Waterloo in 1860.

Arctic Paradox refers to the lack of habitation and poor socio-economic development of the Arctic, despite its huge wealth of resources like oil, gas and minerals and fisheries.

→ This paradox occurs due to underexploitation of the region

→ Since Arctic is a no-man's land, hence it is sometimes underutilised.

→ However, due to growing geopolitical rivalries, nations have gained interest in the Arctic.

- Due to rising problems of global warming and strange, extreme and sudden phenomenon of Arctic Polar Vortex, researchers have acquired interest in Arctic.
- This will help them to investigate the impact of global warming on the melting of glaciers and its consequences on fisheries and biodiversity.
- Since Arctic has not been researched enough despite the interest of nations in it, this is a paradox.

SPATIAL DISTRIBUTION OF :-

- MINERAL RESOURCES in Arctic
 - Minerals like:
 - Cobalt
 - Lithium
 - Polymetallic nodules are

present in the Arctic.

→ These minerals like cobalt, lithium can be used for manufacturing of electronic vehicles.

- DISTRIBUTION OF ENERGY RESOURCES

→ Solar energy is available at Arctic for 6 continuous months, which can be harnessed for creating solar power.

→ Wind, Tidal and Geothermal energy can be explored.

→ Hydro energy is also now available at Arctic due to melting of glacier.

Thus, Arctic region is a reservoir of mineral and energy resources.

Cryosphere refers to the region which is covered with snow, ice and other forms of frozen water.

DEVASTATING IMPACT OF CRYOSPHERE

• ON Ecosystem:

- Melting of glaciers can lead to excessive freshwater in oceans
- Due to global warming, the water evaporates over time and water bodies become saline, adversely affecting fishes and other marine organisms.
- Dead zones develop in water bodies
- The methane buried under ice and permafrost is released when ice melts, ~~adversely~~ adversely affecting ecosystem.

DEVASTATING IMPACT ON PEOPLE:-

- Melting of glaciers leads to floods
- Cloud bursts become frequent
- Sources of freshwater decline as fewer glaciers left
- Water scarcity
- Salination and contamination of water
- Flow of water bodies reduces, adversely affecting fishing and other economic activities
- Nanigation in inland waterways becomes difficult
- Economic hardship of people dependent on blue economy
- loss of livelihood, life and property when extreme floods occur.

MEASURES To TACKLE THIS THREAT

- Reduce carbon emissions
- Adopt renewable energy
- Take steps to mitigate climate change and global warming which leads to melting of glaciers
- Carbon sequestration
- Evacuate people from flood prone areas
- Install early warning systems
- Increase R&D on the impact of melting of glaciers
- Allow scientists to study the nature of glaciers in Arctic, Antarctic and Himalayas.

Thus, all these measures can help to tackle the devastating impact of cryosphere changes.

Urban flooding occurs when the supply or downpour of rainwater from the clouds exceeds the ability of the land surface to absorb it.

CAUSES OF URBAN FLOODING

- Global warming
- Climate change
- Cloud bursts
- Inundation of a large area within a small period of time
- Lack of proper sewerage system
- Cilted drains
- Unplanned urbanization
- Lack of water bodies to absorb rainwater.

RISK TO URBAN ECOSYSTEM

Risk is the expected amount of losses to the ecosystem due to floods.

$$\boxed{\text{Risk} = \frac{\text{Hazard} \times \text{Vulnerability}}{\text{Capacity}}}$$

→ The risk to urban ecosystem is high due to

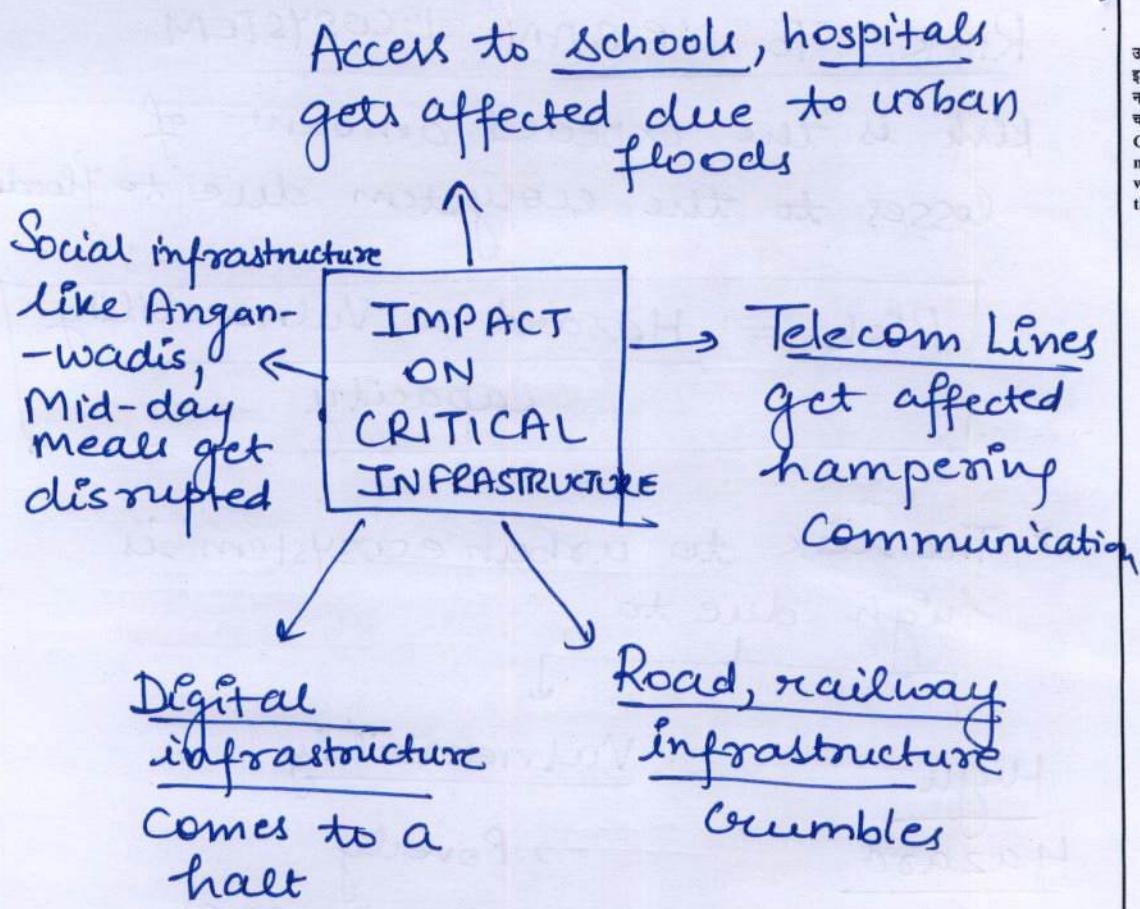

High Hazard
due to
climate
change

Vulnerability

- Poverty
- Slums are difficult to demolish
- Urbanization
- Encroachment of land near water bodies.

CAPACITY is limited, due to which risk increases.

→ The administrative capacity to revamp the drain structure, sewage structure and to rescue people from urban floods is limited.

SOLUTIONS:-

- PES (Payment for Ecosystem Services)
Model of New York needs to be adopted i.e. govt. needs to pay people for preserving the catchment areas of water bodies, so that urban floods do not occur
- Reduce encroachment of catchment areas
- Build bioswales and rainwater harvesting structures. (Minirshah Committee)
—All this will help to control urban floods

*Sand obtained from
water bodies has multiple uses.*

ECONOMIC SERVICES OF SAND :

- Fine sand is used as construction material
- Used in real estate
- Helps in binding of bricks
- Also used to → create
glass products (as Sand contains silica)
- Ceramic products are also manufactured with sand
- Pottery also utilizes sand
- Sand also used in aquaguard filters — helps in Reverse Osmosis.

PRESENT STATUS OF SAND-MINING IN INDIA

- Sand is being illegally mined
- This reduces the water carrying capacity of water bodies
- Adversely affects fisheries and water ecosystem.

SUSTAINABLE SAND MINING :-

- will lead to conservation of groundwater
- prevent floods
- maintenance of marine biodiversity
- give enough time to rocks in the water bodies to regenerate sand
- revitalise marine ecosystems
- sustainable dredging will allow enough time to water bodies to replenish themselves with sand.

Thus, the government needs to stop illegal sand mining and promote the use of artificial sand for real estate purposes so that dependence on natural sand can be reduced.

Unbridled and unbalanced
growth of urban spaces have
led to several problems like:

- Encroachment
of catchment
areas of
rivers

- This leads to urban floods
- Pollution of air, rivers
- Development of slums
near islands of prosperity i.e.
posh areas (unbalanced
growth)
- Impoverishment of farmers
- Shrinking of cultivable lands
to accommodate more factories
and offices

- Plastic pollution has choked drains
- Water bodies have got silted and polluted reducing their water carrying capacity.
- Urbanisation has led to urban areas becoming Urban Heat Islands (due to increasing use of concrete)
- Poor Waste Management has led to mountains of garbage heap in urban areas.

REFORMS NEEDED IN URBAN PLANNING AND CAPACITY

- REFORMS IN PLANNING
 - Urban spaces need to be reimagined
 - Water bodies need to be conserved, rejuvenated
 - Ban plastics to reduce plastic pollution

- Green spaces need to be developed
- Promote urban forestry.
- Prevent illegal encroachments of catchment areas
- Revamp drainage and sewerage structure to prevent floods
- Build bioswales, ponds and rainwater harvesting structures
- Building Codes to be adhered to make buildings energy efficient.

REFORMS IN CAPACITY

- Increase funding from State Government
- The functions in Schedule XII need to be devolved to municipalities
- Human resources need to be augmented through lateral hiring
- Capacity building sessions on urban space management.

Thus, reforms are urgently needed for efficient management of urban spaces.

Feminist movements in India have generally involved western upper class women only and have left behind women with poor socio-economic backgrounds.

ARGUMENTS IN FAVOUR:

Me Too Movement was spearheaded only by urban, well educated women. However, rural women who also face sexual harassment in their jobs at farms or factories, did not get a chance to raise their voice.

→ Social media is mostly used by western upper class women. Poor, rural women lack the

wherewithal to access digital devices and the digital literacy to operate social media

- Awareness level of upper class women is quite high.
- Legal help is easily arranged by upper class women
- The authorities, NGOs, civil society, courts are more receptive to voice of upper class women with higher financial resources.

ARGUMENTS AGAINST :-

- Women like Bhawri Devi did not belong to upper caste, yet she was provided justice through the courts.

- Activists and NGOs come out to support women with weak financial backgrounds.
Eg:- Bilkis Bano was supported by NGOs to file a case against remission granted to the convicts who gangraped her.
 - Administration :- Bureaucrats are empathetic to needs of rural, poor women.
Eg:- Pension benefits, ration benefits are immediately provided to women in need.
 - Police has become more gender-sensitive
 - Media also helps rural women to raise their grievances
- Thus, inclusivity is increasingly being witnessed in current feminist movements in India.
