

BIOLOGICAL CLASSIFICATION
WORKSHEET-1

1	Who proposed two kingdom classification?	1
2	Name the specialized structure of cyanobacteria helping in fixation of atmospheric nitrogen.	1
3	Identify the organism causing red tides.	1
4	List the characteristics chosen for five kingdom classification.	1
5	Euglena are myxotrophic. Why? Also identify the outer layer of Euglena.	2
6	What is diatomaceous earth. Write its uses.	2
7	Name the 4 major groups of protozoans.	2
8	Describe different types of bacteria.	2
9	What do you mean by a) Viroids b) Bacteriophages	2
10	Describe the structure of TMV with the help of a diagram.	3
11	Write a note on Deuteromycetes.	3
12	What are lichens? Name their components. How are they significant in environmental studies.	3
