a) Murray Bookchin b) Rober K. Merton c) Karl Marx d) Amita Baviskar

**Ans.** Murray Bookchin

**Que.5.** Water theme amusment parks are increasing day by day in every rock and corner of country. How far it affect the life of the people? Cite an example for these type of environment–society conflicts. [Marks :(4)]

**Ans.** influence on life – 2

example – 2

**Que.6.**

[Marks :(5)]

**Identify the problem depicted in the above picture. Analyse the consequences, and how it become a social problems.**

**Ans.** Identification – 1

analysis – 2

social problem - 2

**Que.7. Do you consider the modern society as Risk Society? Explain with suitable examples** [Marks :(3)]

**Ans.** technology – production – not fully grasped – 2

eg. accident like Bhopal -

**Que.8. 'Women are intrinsically less able than men and blacks naturally less able than whites.' Critically examine the statement in the light of different perspective on environment.** [Marks :(5)]

**Ans.** influence of nature – 2

influence of environment – 2

critical examination - 1

**Que.9. The interaction between environmental and society is shaped by .....**

**a) Ecology b) Social environment c) Social organisation d) Human action** [Marks :(1)]

**Ans.** Social organization

**Que.10. Classify the following environmental problems into man-made and nature-made**

**Bhopal disaster, tsunami, deforestation, earth quake** [Marks :(2)]

**Ans.**

Man made	Nature made
Bhopal disaster deforestation	Tsunami earth quake

**Que.11. Define Global Warming? State major effects of global warming.** [Marks :(5)]

**Ans.** Global warming – 2

effects - 3

**Que.12. Examine the positive and negative impact of generally modified organisms on our ecology?** [Marks :(4)]

**Ans.** positive impact - 2

negative impact – 2

**Que.13. Cite any two examples to prove that social inequalities may lead to environmental crisis.** [Marks :(4)]

**Ans.** Social status and power in ..... - 2

Public interest – politically, economically, powerful – 2

**Que.14. Evaluate major environmental issues associated with resource depletion.**

[Marks :(5)]

**Ans.** using non-renewable natural resources – 1

depletion of distribution of water – 1

rivers has been damaged – 1

biodiversity habits – 1

evaluation – 1

**Que.15. Briefly explain any three important forms of pollution – related environment hazards.**

[Marks :(6)]

**Ans.** Air pollution – 2

Water pollution – 2

Noise pollution - 2
