

Q.1 Fill in the blanks.

(5)

- (1) _____ is the gaseous form of water.
- (2) Water is found in _____ forms.
- (3) When we _____ water vapour it changes into water.
- (4) _____ is lighter than water.
- (5) The _____ of a substance from the vapour state to a denser liquid or solid state is called condensation.
- (6) _____ has no fixed shape.
- (7) Substance which as a certain shape, volume and hardness is called _____
- (8) _____ and _____ gases make water.
- (9) _____ cannot be seen.

Q.2 Solve and find 6 sources of water

(3)

Q	U	L	P	L
M	N	A	S	T
P	F	K	E	X
O	C	E	A	N
N	H	R	X	I
D	Z	N	Y	A
R	I	N	E	R

Q.3 Answer the following.

(4)

- (1) Define (i) Evaporation (ii) Solid : Ans. : _____
- (2) Which two gases make water ?
- Ans. : _____
- (3) How will you make ice from water ?
- Ans. : _____

Q.4 State whether the following statement are true or false.

(4)

- (1) We can see, feel & taste water. _____
- (2) The three forms of water can be changed from one to another. _____
- (3) Ice has no fixed shape. _____
- (4) Substance which has a certain shape, volume and hardness is called liquid substance. _____
- (5) Evapouration takes place only once in a while. _____
- (6) Ice removed from the freezer and placed in open melts. _____
- (7) Ice is heavier than water. _____
- (8) Water vapour is the liquid form of water. _____

Q.5 Match the following.

(2)

- (1) Ice

(a) gas
- (2) Water

(b) solid
- (3) Water Vapour

(c) water
- (4) H₂O

(d) liquid

Q.6 Name the forms of water.

(2)
