Non-Berbal Classification

NON-BERBAL CLASSIFICATION

CLASSIFICATION

In these type of questions, four figures numbered (A), (B), (C) and (D) are given. These are treated both problem figures as well as the answer figures. Three out the these four figures are related to each other by way of having some common characteristics and so from a group. Out of these four, you have to identify one figure which does not belong to group.

Sol. (C) Both the arrow heads are in the same direction in figure (C). In all other figures, they are in the opposite direction, Hence, (C) is the answer.

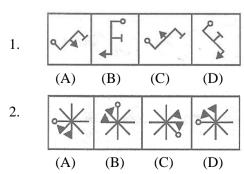

Sol. (D) Between the shaded portion and the arrow, there are two triangles in figure (A), (B), (C) and (D).

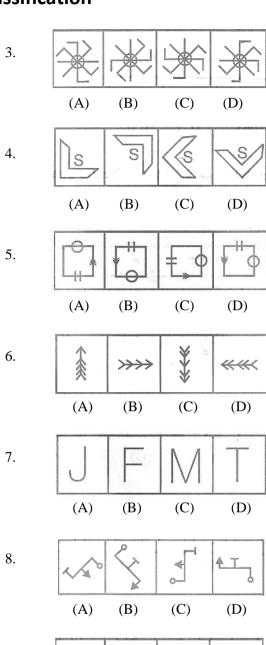

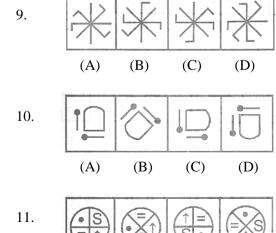

Sol. (C) Figures (A) and (D) form a group. The bars are interchanged here. Similarly, figure (B) and (D). Hence (C) is the odd one out.

EXERCISE

Directions: (1 to 13) Out of the four figures (A), (B), (C) and (D), given in each problem, three are similar in a certain way. However, one figure is not like the other three. Choose the figure which is different from the rest.

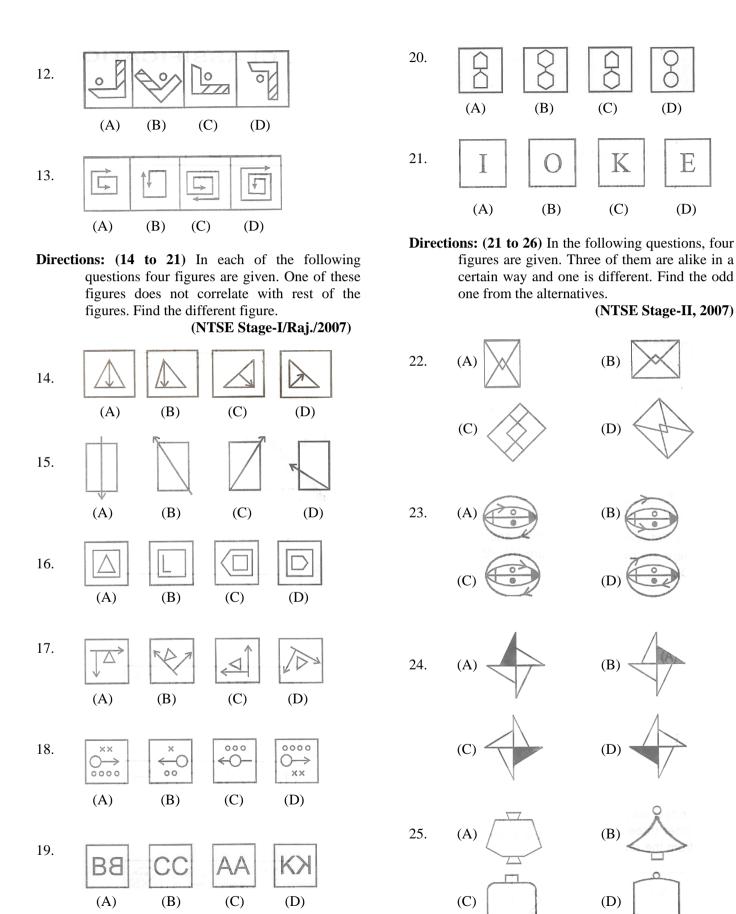

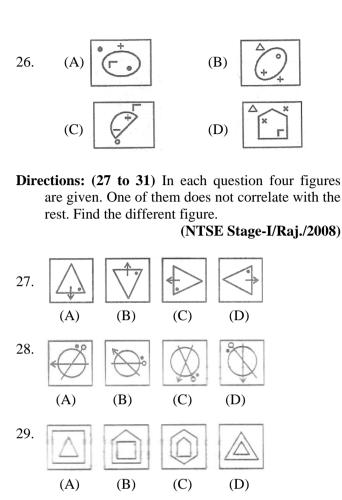

(B)

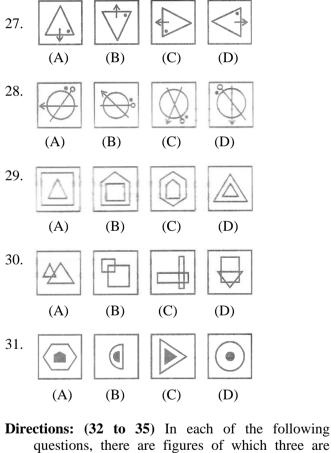

(A)

(C)

(D)

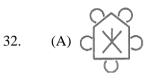

(B)

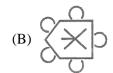

(D)

(NTSE Stage-I/Raj./2008)

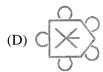

similar in a certain way, and one is different. Find the one that is different from the rest.
