CBSE Test Paper 02 Ch-10 Financial Statements-II Adjustments

Answer

1. The entry for the adjustment of Outstanding rent for 1 month will be as follows:

Narration: Being the rent due for a month credited to Outstanding rent account.

| Dr. |
|-----|
| |
| |

Rent to be paid is a nominal account and has been debited.

Outstanding rent is a current liability and therefore, has been credited.

- Goods worth Rs 3,00,000 will be deducted from purchases on the debit side of trading account. Insurance claim of 1,80,000 will be shown on the assets side of the balance sheet and the remaining amount of Rs. 1,20,000 will be shown on the debit side of profit and loss A/c
- 3. By way of deduction from capital, as it is considered as drawings by the proprietor.
- 4. Prepaid expenses are segregated from the current year's expenses and taken to the balance sheet as a current asset because such expenses relate to the next year, which have been paid in advance. Therefore, with reference to the accrual basis of accounting they are considered independent of the current year's expenses.
- 5. The provision for doubtful debts is the estimated amount of bad debt that will arise from accounts receivable that have been issued but not yet collected. It is identical to the allowance for doubtful accounts. The provision is used under accrual basis accounting so that an expense is recognized for probable bad debts as soon as invoices are issued to customers, rather than waiting several months to find out exactly which invoices turned out to be uncollectible. Thus, the net impact of the provision for doubtful debts is to accelerate the recognition of bad debts into earlier reporting periods. The Bad Debts Provision is shown in the balance sheet on the asset side by way of deduction from debtors or on liability side under the head provisions.
