

PRE-NURTURE COURSE

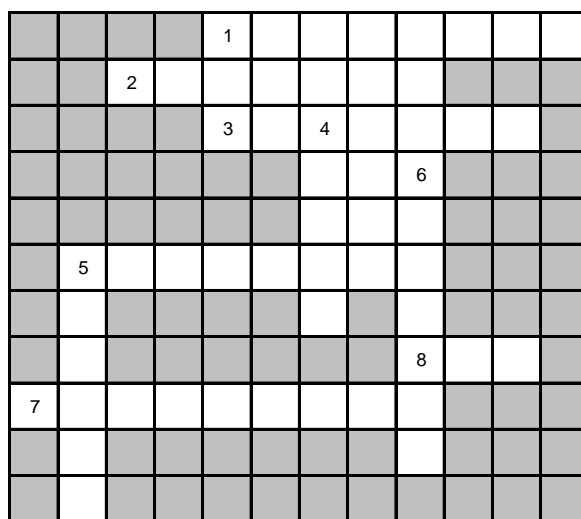

CLASS-IX : PHASE-I

RACE # 01

MATTER IN OUR SURROUNDING

CHEMISTRY

CORSSWORD

ACROSS

1. Force of attraction between particles of same substance.
2. Due to closeness of constituent particles, solid possess high
3. Physical state of matter in which weak interparticle attraction is there.
4. Liquids have definite volume but no definite
5. Term used to describe specific kind of matter.
7. Spontaneous intermixing of particles of 2 different types of matter.
8. Solid state of water.

DOWN

1. A gas used as fuel in internal combustion engine.
4. Physical state of matter which has definite shape.
5. Kinetic energy is the energy of a body due to its
6. Process of changing of solid state into liquid.
