

2 ON VIOLENCE

There is a great deal of **violence** in the world. There is physical violence and also inward violence. Physical violence is to kill another, to hurt other people consciously, **deliberately**, or without thought, to say cruel things, full of **antagonism** and hate, and inwardly, inside the skin, to dislike people, to hate people, to criticise people. Inwardly, we are always quarrelling, battling, not only with others, but with ourselves. We want people to change; we want to force them to our way of thinking.

In the world, as we grow up, we see a great deal of violence, at all levels of human existence. The **ultimate** violence is war- the killing for ideas, for so called religious principles, for nationalities, the killing to preserve a little piece of land. To do that, man will kill, destroy, **maim** and also be killed himself. There is enormous violence in the world, the rich wanting to keep people poor and the poor wanting to get rich and in the process hating the rich. And you, being caught in society, are also going to contribute to this.

There is violence between husband, wife and children. There is violence, antagonism, hate, cruelty, ugly criticism, anger -all this is **inherent** in man, inherent in each human being. It is inherent in you. And education is supposed to help you to go beyond all that, not merely to pass an examination and get a job. You have to be educated so that you become a really beautiful, healthy, sane, **rational** human being, not a **brutal** man with a very clever brain who can argue and defend his brutality. You are going to face all this violence as you grow up. You will forget all that you have heard here, and will be caught in the stream of society. You will become like the rest of the cruel, hard, bitter, angry violent world and you will not help to bring about a new society, a new world.

But a new world is necessary. A new culture is necessary. The old culture is dead, buried, burnt, exploded, **vapourised**. You have to create a new culture. A new

culture cannot be based on violence. The new culture depends on you because the older generation has built a society based on violence, based on aggressiveness and it is this that has caused all the confusion, all the misery. The older generations have produced this world and you have to change it. You cannot just sit back and say, "I will follow the rest of the people and seek success and position." If you do, your children are going to suffer. You may have a good time, but your children are going to pay for it. So, you have to take all that into account, the outward cruelty of man to man in the name of god, in the name of religion, in the name of self-importance, in the name of the security of the family. You will have to consider the outward cruelty and violence, and the inward violence which you do not yet know.

You are still young but as you grow older you will realise how inwardly man goes through hell, goes through great misery, because he is in constant battle with himself, with his wife, with his children, with his neighbours, with his gods. He is in sorrow and confusion and there is no love, no kindliness, no **generosity**, and no charity. And a person may have a Ph.D. after his name or he may become a businessman with houses and cars but if he has no love, no affection, kindliness, no consideration, he is really worse than an animal because he contributes to a world that is destructive.

So, while you are young, you have to know all these things. You have to be shown all these things. You have to be exposed to all these things so that your mind begins to think. Otherwise you will become like the rest of the world. And without love, without affection, without charity and generosity, life becomes a terrible business. That is why one has to look into all these problems of violence. Not to understand violence is to be really ignorant, is to be without intelligence and without culture. Life is something enormous, and merely to **carve out** a little hole for oneself and remain in that little hole, fighting off everybody, is not to live. It is up to you. From now on you have to know about all these things. You have to choose deliberately to go the way of violence or to stand up against society.

Be free, live happily, joyously, without any antagonism, without any hate. Then life becomes something quite different. Then life has a meaning, is full of joy and clarity.

When you woke up this morning, did you look out of the window? You would

have seen those hills become saffron as the sun rose against that lovely blue sky. And as the birds began to sing and the early morning cuckoo cooed, there was a deep silence all around, a sense of great beauty and loneliness, and if one is not aware of all that, one might just as well be dead. But only a very few people are aware. You can be aware of it only when your mind and heart are open, when you are not frightened, when you are no longer violent. Then there is joy, there is an extraordinary **bliss** of which very few people know, and it is part of education to bring about that state in the human mind.

Study the following sentences:

- (i) He wrote a letter.
- (ii) He did not write a letter.
- (iii) Did he write a letter?
- (iv) Did he not write a letter? Or Didn't he write a letter?

The above examples show an activity completed in the past. These are said to be in the **Simple Past form** : (i) is an affirmative using the past form of the verb, (ii) is negative using did not + present form of the verb, (iii) is interrogative using 'did' before the subject and the present form of the verb and a question mark at the end, and (iv) is negative interrogative.

The Simple Past tense is used for an action which took place in the past and is completed by the time of speaking. The following adverbs are normally used in this tense:

This tense is used for continuous actions in the past about whose beginning and end we are not concerned. It is most often found in compound sentences with another verb in the Simple Past Tense to describe the background against which the Simple Past Tense took place:

I was reading a book **when** you came in.

It is often found with adverb clauses beginning with **while** and **when** and other adverbs which show the duration of the action:

Past Perfect tense is generally found:
