

## C.V. Raman, the Pride of India

## Look at the pictures and answer the questions that follow:

- 1. Who are these people?
- 2. Tell your class what you know about them.
- 3. Do you want to be a scientist? Why?

Oral Discourse: Talk on - "Impact of scientific inventions on human life."

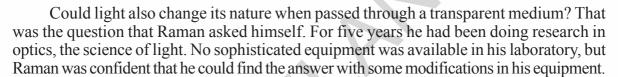

## Reading

On the busy Bowbazaar Street in Calcutta there was an old building. It was the headquarters of the Indian Association for Cultivation of Science. In December, on a fine evening in 1927, there was much excitement in one of its laboratories. Chandrasekhar Venkata Raman was showing a visitor some of his instruments when a young man, K.S.Krishnan, rushed in and announced, "Professor Compton has won the Nobel Prize."

Raman was equally delighted. "Excellent news," he said, smiling at the visitor and then he was lost in thought. "But .... look here, Krishnan," he said turning to the young man, "if this Compton Effect is true of X-rays, it must be true of light too."

A few years earlier, A.H.Compton had shown that the nature of X-rays changes when passed through matter. The change was dependent on the kind of matter. This effect was called the 'Compton Effect.'

Four months later, on March 16, 1928, Raman announced his discovery of 'new radiation' (describing the behaviour of a beam of light passing through a liquid chemical) to an assembly of scientists at Bangalore (now called Bengaluru).

The world hailed the discovery as the 'Raman Effect'. For scientific research in this country, it was a red-letter day. His discovery caught the attention of the world. With equipment worth hardly Rs. 200/- and limited facilities, Raman was able to make a discovery which won him the Nobel Prize in physics in 1930.

Raman was born on November 7, 1888, Tiruchirapalli in Tamil Nadu. His father was a physics teacher in a college. He was a brilliant student right from the start. When Raman passed his matriculation. his parents were keen to send him abroad for higher studies. But on medical grounds, a British surgeon advised them against it and Raman stayed in the country to do the M.A. course at Presidency College in Madras (now called Chennai).

Science had already made an impression on him and he began to write research papers for science journals. When he was only 19, he became a member of the Indian Association for Cultivation of Science. Meanwhile, respecting his parents' wishes, he took up an administrative job in the Finance Ministry in Calcutta. His interest in science, however, did not flag. He used to spend his hours after office in the lab of the Association working throughout the night.

In his youth, Raman was mainly interested in acoustics, the science of sound. He studied how stringed instruments like the violin and the sitar could produce harmonious music

He was elected to the Royal Society of London in 1924 and the British Government made him a knight of the British Empire in 1929. It was a high honour for any great scientist.

His advice to young scientists was to look at the world around them and not to confine themselves to their laboratories. "The essence of science," he said, "is independent thinking and hard work, not equipment."

C.V.Raman was the first Indian scholar who studied wholly in India and received the Nobel Prize. He was the first Asian and the first non-white to win such a great award in science. He passed away in 1970 on November 21. But his memories are with us. February 28, the day on which he discovered the 'Raman Effect', is celebrated as National Science Day to commemorate his remarkable achievement in science.

(Adapted from SCIENTISTS OF INDIA published by Children's Book Trust, New Delhi)

## Glossary

lost in thought: giving all your attention to something so that you do not notice

what is happening around you

transparent (adj): allowing you to see through it

sophisticated (adj): advanced and capable

equipment (n): the things that are needed for a particular activity

modification(n): change

discovery (n): the process of finding something that was not known about

before

red-letter day (idiom): an important day

surgeon (n): a doctor who is trained to perform surgery

abroad (adv): in or to a foreign country flag (v): decline, become less

stringed instrument (n): any musical instrument with strings (eg. the violin, the sitar etc.)

harmonious (adj): very pleasant

knight (n): a man of high social rank / a person with the title

confine (v): to restrict

#### How well did I read?

Fill in the boxes using yes/ somewhat/ no.		
I enjoyed reading the passage.		
I got the idea of the passage on my own.		
I got the idea with the help of my friends in the group.		
The teacher helped me to understand the passage.		
I used the glossary given at the end of the passage.		

## I. Answer the following questions:

- 1. Why was Raman happy when he learnt that Professor Compton had won the Nobel Prize?
- 2. What does the "Compton Effect" tell us?
- 3. What was Raman's advice to young scientists?
- 4. Which paragraph tells about the ill health of C.V. Raman?
- 5. What was the challenging situation when Raman started his experiment on light?
- 6. What was the unseen force working behind Raman for reaching great heights?
- 7. What is "Raman Effect"?
- 8. If A.H. Compton had not discovered the Compton Effect, do you think Raman would have discovered the Raman Effect? Give your reasons.
- 9. In what way was Raman different from other Indian scientists? List them and justify your answer.
- 10. If you were a scientist, what would you like to invent / discover?

## II. Find whether the following statements are true or false and correct the false statements.

1.	C. V. Raman was born in Calcutta.	(	)
2.	The Compton Effect was a discovery made by C.V.Raman.	(	)
3.	Raman's mother was a college physics teacher.	(	)
4.	Raman was an average student at school.	(	)
5.	Raman studied how the drum could produce music.	(	)
6.	Raman spent only two hundred rupees to win the Nobel Prize.	(	)
7.	Raman was only 42 when he won the Nobel Prize.	(	)

# Vocabulary

I.			ees are from your lesson. ng of the underlined word	Read them carefully and tick in each sentence.	
	1. His parents were keen to send him abroad for higher studies.				
		(a) particular	(b) eager	(c) worried	
	2.	The world hailed	the discovery as the 'Raman	Effect'.	
		(a) admired	(b) called	(c) thought	
	3.	In his youth Rama	an was mainly interested in a	coustics.	
		(a) primarily	(b) simply	(c) certainly	
	4.	The British made	Raman a knight of the Britis	h Empire.	
		(a) appointed	(b) managed	(c) placed	
	5.	Raman passed aw	vay on November 21, 1970.		
		(a) was killed	(b) died	(c) left	
II.	Read	I the following se	ntence.		
m1		nan was equally del			
hap	piness		'delight.' Now look at the f	ised to express a feeling of joy or collowing verbs and write their	
	S.No	o. Verb	Noun or the feelin	g expressed	
	1.	enjoyed	enjoyment		
	2.	surprised			
	3.			<del> </del>	
	٥.	disappointed			
	4.	disappointed worried			
	4. 5.	worried satisfied n the blanks with	the suitable noun forms o	f the underlined words in each	
	4. 5. v fill i tence.	worried satisfied n the blanks with was shocked to		f the underlined words in each  n but he recovered from his	
sent	4. 5. v fill i tence.	worried satisfied n the blanks with was shocked to	see a snake in his roon in no time.	n but he recovered from his

III. (1) Read the following sentence and notice the underlined pa
---

Raman stayed in the country to do the M.A. course.

The underlined letters in capitals denote an abbreviation. The full form of this abbreviation is 'Master of Arts'.

Here is a list of some common abbreviations. Write their full forms.

Abbreviation	Full form
B.A	
A.D	
B.C	
C.M	
C.D	
D.V.D	
a.m	
p.m	

## (2) Read the following sentence and notice the underlined word.

He used to spend his hours after office in the *lab*.

The underlined word "lab" is the short form of "laboratory."

Look at the following list of short forms and write their full forms. The first one is done for you. (Use a dictionary)

Short form of the word plane	Full form of the word aeroplane
kilo	
para	
specs	
photo	
bike	
mike	

IV. In the paragraph 4 you have learnt that 'optics' is the study of light. Do you know the word for the *study of living beings*? It is 'biology'. It comes from 'bio' (means 'life') + 'logus' / 'logy' (means 'study or science'). So the suffix '-logy' adds the meaning 'the study of'.

Guess the meanings of the words under Column A and match them with the phrases under Column B.

A			В		
1.	Archaeology	(	)	(a)	the study of the mind
2.	Physiology	(	)	(b)	the study of animals
3.	Psychology	(	)	(c)	the study of earth
4.	Geology	(	)	(d)	the study of the cultures of the past
5.	Zoology	(	)	(e)	the study of the bodies of living things

## Grammar

- I. Read the following sentences from your lesson and observe how the underlined words are used before dates, years and the names of places.
  - 1. Raman was born on November 7, 1888. (Para 6)
  - 2. Raman passed away in 1970 on November 21. (Para 11)
  - 3. Raman did his M.A. course at Presidency College in Madras. (Para 6)
  - 4. In December, on a fine evening in 1927, there was much excitement. (Para 1)

Note: 'on', 'in' and 'at' are prepositions of time and place. In sentence 1 & 2 'on' is used before a date. In sentence 2, 3 & 4 'in' is used before a year (in 1970), before the name of a big city (in Madras) and before the name of a month (In December). In sentence 3 'at' is used before the name of a small place / area.

Now fill in the blanks with 'in' or 'on' or 'at'.

Sarathchandra and Keerthana are brothe	er and sister. Sarathchand	ra was born	
25 <sup>th</sup> April 2000. Keerthana was bo	rn Decemb	er 2, 2001.	They are
with their parents. They live Masaip	et, a small village	Medal	k District
They play games school. It is usua	ally very hot	_ May	their
village. So they spend their summer	Hyderabad	_their uncl	e's house
Mr. Srisailam is their uncle. He resides	High Court Colony _	F	Iyderabad
with his wife, Jagadeeswari and his daughter,	Vishnu Priya.		

#### II. Revision of 'Articles'.

- 1. 'a' is used before singular common nouns /in noun phrases beginning with consonant sounds.
- 2. 'an' is used before singular common nouns / in noun phrases beginning with vowel sounds.
- 3. 'the' is used
  - (a) before words / phrases that indicate unique things ("It was the headquarters of **the Indian Association** ....')
  - (b) in situations where the sentence itself contains a clue to identify the thing or the person referred to (e.g. His advice to young scientists was to look at **the world around them**)
  - (c) in social situations where the identity of the person / object is understood ("But ... look here, Krishnan," he said turning to **the young man** ...").
  - (d) before the names of 'musical instruments ("He studied how stringed instruments like **the violin** ...")
- III. List 20 phrases from the text that begin with 'a'/ 'an' or 'the'. Then put 1,2, 3(a), 3(b), 3(c), or 3(d) against them depending on how 'a'/ 'an' or 'the' is used. One is done for you.

#### an old building -2

Now fill in the blanks with 'a', 'an' or 'the'.

1.	In 1987 M.S. Swaminathan was awarded Ramon Magsaysay Award.
2.	We dined yesterday at Maurya Sherton hotel.
3.	Tejaswini lent me interesting book.
4.	My father is school teacher.
5.	M.S.Swaminathan worked at Indian Agricultural Research Institute.
6.	Rekha boughtlong notebook yesterday.
7.	Sravani is eating mango now.
8.	Ganesh always carries umbrella with him.
9.	Rambabu is English teacher in a high school.
10.	Manjula and Sruthi play guitar well.

## I. Write the Biography of J.C. Bose using the information given below. You must use the right linkers to join the sentences.

J.C. Bose – Indian scientist – born 30-09-1858 – St. Xavier's School, Calcutta – abroad for higher studies – returned in 1885 – published a monograph, Response in the Living and Non-living – became famous – Fellow of the Royal Society in 1920 – wireless telegraphy in 1895 – the Crescograph – plants have life – the Bose Institute in Calcutta – devoted to the study of plants – died 23-11-1937.

Share your draft with your partner and refine your draft in the light of the suggestions offered by him.

#### How well did I write?

Fill in the boxes using yes/ somey	yhat/ no.
I was able to write the biography.	
The sentences I used were properly connected.	
I was able to express my ideas in apt words.	
The ideas were arranged in proper sequence.	
I used proper punctuation marks.	

#### How well did I edit my work?

Fill in the boxes using yes/ somewhat/ no.		
I deleted the excess words.		
I corrected the wrong forms of words.		
I corrected the punctuation errors.		
I added new words wherever necessary.		
I corrected the misspelt words.		

## II. Editing

The passage given below has some errors in the use of capital letters, verbs, prepositions and articles. Edit the passage by underlining the incorrect parts and writing them correctly over the space available. The first one is done for you.

born

Raman was borne on November 7, 1888, in tiruchirapalli at tamil nadu. He finishes his m.a. course at Presidency college in chennai. He became member of the indian association for cultivation of science. He took up a administrative job in the finance

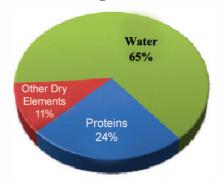

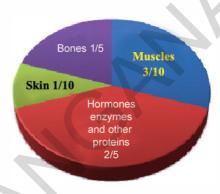

ministry in Calcutta. He was elected to the royal society of London in 1924 and the british government made him a knight of the british empire in 1929. He was first indian scholar who studied wholly in india and received the nobel prize.

## **Study Skills**

I. Study the pie charts and answer the questions given below them.

Distribution of Weight in Human Body

- 1. Which of the following constitute most of the weight in the human body? (
  - (a) water
- (b) proteins
- (c) dry elements
- (d) bones
- 2. Which of the following statements is correct?

- ( )
- (a) Proteins constitute 11 per cent of the human body.
- (b) Dry elements constitute 15 per cent of the human body.
- (c) Hormones, enzymes and other proteins constitute 2/5 of the human body.
- 3. If a person's weight is 100 kilograms, how much do his bones weigh?
- 4. If the proteins in a person weigh 12 kilograms, what will be his weight?
- 5. Are the bones in our body heavier than the water in our body? Support your answer.

## Listening and Speaking

Your teacher will read the passage 'The Inventor of Inventors.' Listen carefully and answer the questions given below:

- I. Say whether the following statements are true or false.
- 1. When Edison was twelve, he established a school.
- 2. Edison discovered an important scientific principle known as the Edison Effect.
- 3. Edison was a poor observer.
- 4. Edison's father was a school teacher.
- 5. Edison loved to mix liquids and powders to observe the reaction.
- II. Here is a list of inventions. Put a ( $\checkmark$ ) against them if it was invented by Edison.

Name of the Invention	
light bulb	✓
aeroplane	
electric engine	
watermark pen	
phonograph	
pedestal fan	
printing machine	
radio	
kinetograph	
computer	
power generator	

## III. Oral Activity

1. Thomas Alva Edison invented electric bulb. If there were no electric bulbs, how would be our life?

#### 2. Debate the following proposition:

'Science has proved to be more a curse than a blessing.' Divide the groups into two sets. One set of students speak in favour of the motion and the other against it. They may use the words / expressions listed in the box.

at the outset	may I begin by saying that	in his speech Mr. X said that
first of all	I look at it this way	I now draw your attention to
secondly	I'd like to explain	on the one hand / on the other hand
thirdly	the subject before us today	now because of this we have to support
lastly	I must add that	and for all these reasons, I propose
to conclude	I must take strong exception to	and there are similar cases such as

## IV. Listen to the conversation between Sindhu and Mary.

Sindhu: Mary, where have you been all the week?

Mary : Um...I have been to Hyderabad.

Sindhu: Hyderabad? Why? Why did you go there?

Mary : You know, my uncle lives there. I went there to visit him.

Sindhu: That's nice. But did you visit any place?

Mary : Oh! Yes, I visited a museum . It's wonderful.

Sindhu: Really! What kind of museum is it?

Mary : It's a science museum.

Sindhu: Science museum? But it should be boring.

Mary : Not a bit. I learnt a lot about many interesting things. You must see it.Sindhu : Is it that much interesting? Could you tell me something more about it?

Mary : Oh! It takes a long time. Now I am in a hurry. I will talk about it later.

Now work with your partner and ask and answer questions about the science fair that might have been organised in your school or district. Use the following questions too.

- 1. When did you go to the science fair?
- 2. What things did you see there?
- 3. Which was the most interesting thing you noticed there?

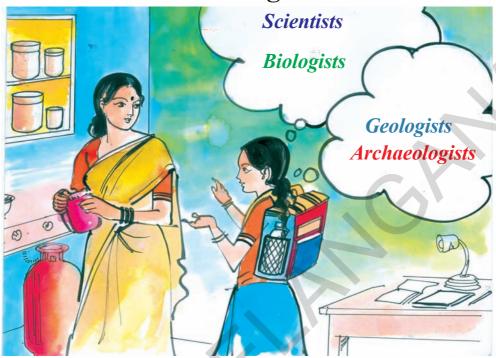

# B. Reading (Poem)

## It's Change......

Mum, I don't want to go to school today, 'Cause I fear our world is in decay.

I feel my teachers are part of the plot, I'm the only one who sees through the rot.

Scientists are cloning pigs and sheep, Saying, it's change — a quantum leap.

Biologists are making stem cells grow, Saying, it's change — the way to go.

Geologists are finding cracks in our earth, Saying, it's change — predicting its birth.

Archaeologists are digging up fossils and bones, Saying, it's change — time for clones.

Yes, scientists are causing me great concern, Giving us kids too much to learn!

- Emma Gorrie

plot (n): a secret plan made to do something wrong

see through (phrasal v): understand

the rot (n): (here) the situation is getting worse cloning (v): producing an exact copy of an animal quantum leap (n): a sudden, great and important change

stem cell (n): a basic type of cell from which all other cells develop

fossil (n): the remains of an animal or a plant which have become hard and

turned into rock

concern (n): worry

#### How well did I read?

Fill in the boxes using yes/ somewhat/ no.			
I enjoyed reading the poem.			
I got the idea of the poem on my own.			
I got the idea with the help of my friends in the group.			
The teacher helped me to understand the poem.			
I used the glossary given at the end of the poem.			

## I. Answer the following questions:

- 1. Who is the speaker of this poem? Guess her age. Support your answer.
- 2. What is the speaker's concern?
- 3. How would you feel if a scientist cloned you?
- 4. What is the speaker's concern? Which line in the poem shows it?
- 5. 'Yes, scientists are causing me great concern.' –
  How is this statement true in view of the speaker? What is your view?
- 6. What does an archaeologist do?
- 7. What would you like to be when you grow up?

# II. Read the following lines from your poem and notice that the underlined words end with the same sound. Such words are called rhyming words.

Mum, I don't want to go to school today,

'Cause I fear our world is in decay.

Now match the following words that rhyme. One is done for you. Add two more words to each pair that rhyme with them.

Part –A	Part – B
plot	go
sheep	rot
grow	leap
earth	birth
bones	learn
concern	clones

Correct Pair of Words			
plot	rot	cot	lot

## **Project**

I. Collect information about any five scientists and write it in your notebooks in the format given below:

Sl. No.	Name of the Scientist	Country	Discovery / Invention	Award
1				

From the list write biography of one scientist and present it before the class.

## C. Reading

## Susruta, an Ancient Plastic Surgeon

It was midnight when Susruta was awakened by a frantic knocking at the door.

"Who's out there?" asked the aged doctor, taking a lighted torch from its socket in the wall and approaching the door.

"I'm a traveller, my revered Susruta," was the anguished reply. "A tragedy has befallen me. I need your help...."

Susruta opened the door. What he saw was a man kneeling before him, tears flowing from his eyes and blood from his disfigured nose.

"Get up, my son, and come in," said Susruta. "Everything will be all right. But be quiet, now."

He led the stranger to a neat and clean room, with the surgical instruments on its walls. He washed his face with water and the juice of a medicinal plant. He then offered him a mug of wine and began preparing for the operation.

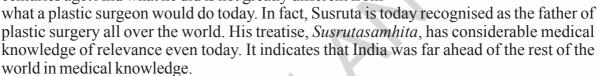

With a large leaf of a creeper brought from the garden, he measured the size of the stranger's nose. Taking a knife and forceps from the wall, he held them over a flame and cut a strip of flesh from the stranger's cheek. The man moaned, but the wine had numbed his senses.

After bandaging the cut in the cheek, Susruta cautiously inserted two pipes into the stranger's nostrils and transplanted the flesh to the disfigured nose. Moulding the flesh into shape he dusted the nose with powdered liquorice, red sandalwood and an extract of Indian barberry. He then enveloped the nose in cotton, sprinkled some refined oil of sesame on it and finally put a bandage.

Before the traveller left, he was given instructions on what to do and what not to do and a list of medicines and herbs he was to take regularly. He was also asked to come back after a few weeks to be examined.

In this manner Susruta mended a nose some 26 centuries ago. And what he did is not greatly different from

Born in the sixth century B.C., Susruta was a descendant of the Vedic sage Viswamitra. He learnt surgery and medicine at the feet of *Divodasa Dhanvantari* in his hermitage at Varanasi. Later, he became an authority in not only surgery but also in other branches of medicine.

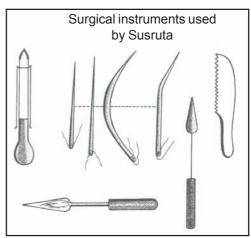

He was the first physician to advocate what is today known as the 'caesarean' operation. He was also an expert in removing urinary stones, locating and treating fractures and doing eye operations for cataract. His suggestion to give wine to patients about to be operated upon makes him also the father of anaesthesia.

In his treatise, Susruta listed 101 types of instruments. His *Samdamsa Yantras* are the first forms of the modern surgeon's spring forceps and dissection and dressing forceps.

In fact, his system of naming surgical tools after the animals or birds they resemble in shape, for example crocodile forceps, hawksbill forceps, is adopted even today.

Susruta was also an excellent teacher. He told his pupils that one could become a good physician only if one knew both theory and practice. He advised his pupils to use carcasses and models for practice before surgery.

(Adapted from SCIENTISTS OF INDIA published by Children's Book Trust, New Delhi)

## I. Answer the following questions:

- 1. Why did Susruta offer the traveller a mug of wine?
- 2. Why was Susruta recognized as the father of plastic surgery today?
- 3. What made him the father of anaesthesia?
- 4. Who could become a good physician according to Susruta?
- 5. What was his advice to his pupils?

#### Do You Know?

- 1. It takes about 20 seconds for a red blood cell to circle the whole body.
- 2. It has been proven that people can lessen reactions to allergies by laughing.
- 3. Six-year-olds laugh on an average of 300 times but adults laugh only 15-100 times a day.
- 4. Water freezes at 32°F and boils at 212°F. There are 180 degrees between freezing and boiling because there are 180 degrees between the North and South.

#### **Self Assessment**

How well have I understood this unit?

Read and tick ( $\checkmark$ ) in the appropriate box.

Indicators	Yes	Somewhat	No
I was able to take part in the discussion on 'Impact of scientific inventions on human life' (Face sheet)			
I read and understood the text:			
A. C.V. Raman, the pride of India			
B. It's Change (poem)			
C. Susruta, an Ancient Plastic Surgeon			
I was able to understand the usage of verbs and their corresponding noun forms, abbreviations and their full forms and able to do the			
given exercises under 'Vocabulary'.			
I was able to understand the usage of prepositions and articles and able to do the given exercises under 'Grammar'.			
I was able to write a biography and able to do the 'Editing' task given under 'Writing'.			
I was able to do the activity given under Study Skills.			
I listened and understood the passage "The Inventor of Inventors" answered the given questions and I was able to take part in the debate given under 'Listening and Speaking'.			
I was able to complete the 'Project Work' and present it to the class.
