

Hots (Higher Order Thinking Skills)

Q.1. Rahul puts a few drops of alcohol on the back of his hand, the alcohol disappears and his hand feels cool. Why does this happen?

Ans. This happens because the heat energy required for the change is provided by the body.

Q.2. What kind of change is the formation of clouds?

Ans. It is a physical change. Water after evaporation goes into the air, and form clouds by condensation process, so the water get back to the earth by precipitation.
