Ans. 'Once you begin to learn there is no end to learning'. I entirely agree with this view. Learning in life should not be limited to the boundary of the school walls. In fact, school learning is just the beginning. The real learning takes place after you leave school.

There are always new things to learn and discover. You can travel, and learn through first hand experiences, or study new languages sitting at home; you can find out about ancient and modern cultures, values of other societies, etc. If you have an interest in science and technology, there are new things being developed every minute. There are new discoveries daily; new inventions and devices are being made all the time. There is astronomy which is a vast subject in itself. There will always be something new for you to learn. The list is never-ending. Today, with electronic and print media both being easily accessible, the ways of learning are literally at our fingertips. Continuously learning something will keep one young and alert.

And finally, a quotation: There is no end to education. It is not that you read a book, pass an examination, and finish with education. The whole of life, from the moment you are born to the moment you die, is a process of learning'. - J. Krishnamurti.

Mahatma Gandhi
