

WORKSHEET CLASS: VI 2014-2015
(GEO.) CHAPTER- 2 GLOBE: LATITUDES & LONGITUDES

I. CHOOSE THE CORRECT ANSWER:-

1. The Arctic Circle is located in _____.
(Southern hemisphere, Northern hemisphere, Eastern hemisphere)
2. The earth moves from _____ to _____.
(East to West, West to East, South to North)
3. _____ help us to calculate time.
(Latitudes, Longitudes, Equator)
4. The standard meridian of India is _____.
(82 1/2° N, 82 1/2° S, 82 1/2° E)
5. The total number of Latitudes are _____.
(360, 180, 90)
6. Parallels of Latitude help in determining _____.
(time climate, places)
7. Grid is a network of _____.
(Parallels of Latitude and Meridians of Longitude, the Tropic of Cancer and Tropic of Capricorn, the North pole and the South pole)
8. _____ zone receives moderate temperature.
(Torrid Zone, Frigid Zone, Temperate Zone)
9. The Frigid Zone is near _____.
(Tropic of Cancer, equator, poles)
10. Latitudes are parallel lines north and south of the _____.
(Equator, Prime Meridian, North pole)

II. FILL IN THE BLANKS:-

1. _____ is the true shape of the earth.
2. _____ represents the zero degree latitude.
3. The value of Prime Meridian is _____.
4. The Tropic of Cancer is located in _____.
5. _____ are equal in length.
6. The area which receives maximum heat is _____.
7. Russia has _____ number of standard times.
8. The latitude parallel to the equator at 23 1/2 ° N is called _____.
9. _____ is the longest parallel of latitude.
10. The earth has been divided into _____ time zones of one hour each.
